

Richard Saunders

Richard is the author of over 30 books for children covering such topics as nature, magic, sports and origami and appeared on many kids TV shows. He is also one of Australia's leading investigators into claims of the paranormal and the supernatural. A documentary maker, Richard recently produced the definitive DVD on the history of water divining in Australia.

Alynda

Alynda has spent the last 20 years as an IT and Music teacher. She has been involved in "under-cover" operations for Australian TV in order

to examine psychic and healing claims. Now as a science communicator and Martial Arts exponent, Alynda brings flair and excitement with her demonstration of "paranormal" effects.

No real pit of fire needed. Our show uses the fire of imagination.

Module	Scientific Concept
Optical Illusions	<i>Fooling The Senses</i>
Spoon Bending	<i>Properties of Metals</i>
Fire Walking	<i>Heat and Temperature Conductivity Insulation</i>
Water Divining	<i>Double Blind Test Placebo Effect Ideomotor Response Medical Testing</i>
Bed of Nails	<i>Energy and Pressure</i>
Psychokinesis	<i>Unseen Forces Gravity Air Pressure Magnetism</i>
Heads and Tails	<i>Statistics Statistical Errors Selecting Results Anecdotal Evidence</i>
Mind Reading	<i>Cold Reading Hot Reading</i>
Astrology	<i>Barnum Effect</i>

This show is suitable for High School years **7 - 12**

Cost: **\$ 6** Ex. GST per Student
\$ 11 Ex. GST per Family

Minimum Audience : **120** (Negotiable)
Maximum Audience : **250** (Negotiable)

Mystery? Investigators

"That's a Good Question!"

Explaining the Strange and Mysterious through the Method of Science

The Science Show for Schools that Exposes the Paranormal

Mystery or Science?

Spoon Bending, Fire Walking, a Bed of Nails, Water Divining. How do you use the scientific method to **investigate and explain** these strange and amazing claims?

The **Mystery Investigators** show demonstrates scientific concepts in a fun and fascinating way by testing paranormal phenomena.

The Benefits

Your students will learn that Science is not just for those who wish to pursue a career in the various scientific fields. Science and Critical thinking are important life skills that may be applied throughout their life. The Mystery Investigators show puts these skills to use in a manner that makes science relevant by drawing on the fun elements of popular culture.

Double Blind Test

Double blind testing is a foundation of the scientific method while divining has long been believed by some, to be a reliable way to find underground water.

Students participate in a real Water Divining and Double Blind Test to demonstrate how this method can be used to investigate claims and draw conclusions.

“The water divining way to demonstrate a ‘double blind’ trial was excellent and made it very clear to the girls.”

Denise Foot
Assistant Head of Science,
Abbotsleigh School for Girls

Something for Everyone

Students get to actively participate in almost every aspect of the show.

Teachers' notes are included as well as web links and other resources for students.

The show emphasises the importance of asking questions with time for students and teachers alike to quiz the Mystery Experts on strange events and amazing claims.

A Bed of Nails is a lot more comfortable than it looks!
